NUMBER AND OPERATIONS - FRACTIONS

NC.4.NF.6	Use decimal notation to represent fractions. • Express, model and explain the equivalence between fractions with denominators of 10 and 100. • Use equivalent fractions to add two fractions with denominators of 10 or 100. • Represent tenths and hundredths with models, making connections between fractions and decimals.
DESCRIPTION	Anchor charts provide opportunities to link important models to deepen student understanding. Notice here how a place value line is accompanied by picture models of tenths and hundredths. Students are able to understand how place value, fractions, and decimals are connected.
